

# Qien Jing

École polytechnique (Polytechnic Institute of Paris), Rte de Saclay, 91120 Palaiseau, France

Tel: +86 13043330095 or +33 07 43 66 38 49

Email: [qien.jing.03@gmail.com](mailto:qien.jing.03@gmail.com) or [qien.jing@polytechnique.edu](mailto:qien.jing@polytechnique.edu)

## Education

---

**École polytechnique (Polytechnic Institute of Paris)** Sept. 2025 - Present  
**Master 1 of General Physics**

**University of Science and Technology of China (USTC)** Sept. 2021 - Jul. 2025  
**B.S. of Physics**  
**Sub-Major:** Plasma Physics

## Research Experiences

---

**Research Assistant** Jul. 2023 - Jul. 2025  
Supervisor: Prof. Huishan Cai (Department of Plasma Physics and Fusion Engineering, USTC)

**Synergistic Effect between Radial Electric Field and Magnetic Shear on Ion Temperature Gradient Mode** Nov. 2023 - Nov. 2024  
University of Science and Technology of China, Hefei, Anhui, China  
Supervisor: Prof. Huishan Cai (Department of Plasma Physics and Fusion Engineering, USTC)

**Lost Region Identification in Fast Ion Phase Space in W7-X Stellarator** Jul. 2024 - Dec. 2024  
University of California, Irvine, CA, USA  
Supervisor: Prof. Zhihong Lin (Department of Physics and Astronomy, UCI)

**Gyrokinetic modelling of the nonlinear interaction between energetic particle-driven instabilities and microturbulence in tokamak plasmas** Apr. 2026 - Present  
Aix-Marseille University, Marseille, France  
Supervisor: Prof. Guillaume Brochard (PIIM)

## Publications

---

- [Synergistic effect between radial electric field and magnetic shear on ITG mode](#), Qien Jing et al 2025 Nucl. Fusion 65 106037.
- [Lost region identification in the fast ion phase space on the W7-X stellarator](#), Q.Jing, E.Green, X.Wei, H.Cai, Z.Lin. (To be submitted)

## Awards & Honors

---

- 2025 Excellent Undergraduate Thesis (This award recognizes students in the top 5% of the annual Undergraduate Thesis Defense)

- 2024 Excellent Undergraduate Research Project (This award recognizes students in the top 5% of the annual Undergraduate Research Project)
- 2023 Excellent Student Scholarship –Bronze (This award recognizes students in the top 20% of their class in the annual comprehensive evaluation)
- 2023 Thesis competition of the Atomic Physics Course (This award recognizes group in the top 30% of the annual competition)

## Research Interests

---

- Magnetic controlled fusion
- Plasma instabilities and turbulence transport

## Extracurricular Activities

---

### **Science and Technology Week: Volunteer guide leader**

Apr. 2023, May. 2024, May. 2025

(This public service activity aimed to popularize science among young students, especially from underdeveloped areas, and to inspire their interest in scientific exploration.)
